

Chathurika Senani Jayathilake

Senior Software Engineer | React | Next.js | React Native | TypeScript | (+94) 713544477

Sri Lanka | chathurikasenani@outlook.com | <https://www.linkedin.com/in/chathurikasenani/>

Senior Software Engineer with 7+ years of experience building scalable web and mobile applications using React, Next.js, React Native, and TypeScript. Experienced in scalable frontend/mobile architecture, modular application design, API integrations, CI/CD workflows, and test-driven development (TDD), with a strong focus on scalable and maintainable solutions across fintech, healthcare, and telecom domains. Proven experience leading frontend initiatives, mentoring engineers, and delivering high-performance products in agile environments.

SKILLS

Languages and Frameworks: React, Next.js, React Native, TypeScript, JavaScript, Node.js, NestJS, HTML5, CSS3, Sass

Frontend Engineering: Redux Toolkit, Context API, React Query/TanStack Query, Component-Driven Architecture, Responsive Design, Cross-Platform Development, Real-Time Features

Architecture and Engineering: Frontend Architecture, Nx Monorepos, REST API Integrations, TDD, CI/CD

Testing and Quality: Jest, Unit Testing

Tools and Delivery: Git, Agile/Scrum, Google Analytics, Figma-to-Code Workflows

EXPERIENCE

Surge Global (Pvt) Ltd, Sri Lanka

Senior Software Engineer (Aug 2021 – Present) - 4 Years 9 Months

- Delivered 14+ web and mobile applications across fintech, healthcare, and consumer platforms using React, Next.js, React Native, and NestJS, focusing on scalable and maintainable solutions.
- Contributed to architecture and design decisions, focusing on scalability and maintainability.
- Worked within Nx monorepo architecture, enabling code sharing, modularization, and improving development efficiency and delivery speed.
- Applied Test-Driven Development (TDD) using Jest within CI/CD workflows, improving code reliability and reducing regression defects.
- Designed a reusable REST API integration layer to standardize integrations across projects and reduce repeated implementation effort.
- Led code reviews and upheld engineering best practices across teams.
- Integrated third-party services including payment systems (Finix ACH, RevenueCat, Apple subscriptions) and analytics tools (Google Analytics).
- Partnered with backend and product teams to identify and resolve critical API integration issues, improving application stability and reducing production incidents.
- Improved CI/CD deployment performance and reduced build times by optimizing Nx monorepo build and deployment strategies.
- Collaborated directly with international clients through onsite engagements and remote discussions, contributing to solution design, feature delivery, and technical decision-making.

Key Highlights

- Supported iOS and Android release processes, production deployments, and post-release issue resolution for React Native applications.
- Developed features including real-time chat, video calling, and complex UI workflows in React Native.
- Improved application stability and user experience by optimizing rendering performance, API handling, and reusable component architecture in React Native applications.

- Contributed to compliance-driven systems with structured workflows and backend integration.
- Leveraged AI-assisted development workflows to accelerate frontend delivery, improve implementation efficiency, and streamline UI development processes.

Omobio (Pvt) Ltd, Sri Lanka *(Sep 2018 – Aug 2021) - 2 Year 11 Months*

Senior Software Engineer

- Led frontend development for a React Native application serving 10,000+ users while coordinating a team of 5 engineers across multiple releases.
- Developed and maintained telecom self-care applications for multiple clients, delivering scalable mobile and web solutions.
- Built responsive and dynamic web applications using Drupal, React, JavaScript, Sass, and PHP.
- Contributed to the revamp of Dialog web platforms, including CMS and self-care applications.
- Developed frontend features for self-care portals using React, improving user experience and responsiveness.

Software Engineer

- Migrated legacy mobile applications from Ionic 1 to React Native to improve maintainability and long-term scalability.
- Implemented structured error handling and resolved critical bugs to reduce application crashes and runtime errors.
- Delivered zero-defect change requests (CRs) for international telecom clients, demonstrating strong ownership and reliability.
- Implemented integrations such as rewards systems (mRewards) within mobile applications.
- Built and enhanced cross-platform mobile applications with a focus on usability, stability, and performance.

SriLankan Airlines, IT Department, Sri Lanka

Software Engineering Intern (Nov 2016 – Mar 2017) - 4 Months

- Contributed to the revamp of the FlySmiLes loyalty program website, improving UI responsiveness and user experience.
- Developed a carbon footprint tracking module visualizing carbon, electricity, and fuel emissions.
- Built reporting features for flight delays and technical defect analysis, supporting operational insights.
- Collaborated with internal teams to deliver features aligned with business and operational requirements.

EDUCATION

- MSc In Big Data Analytics, Robert Gordon University, UK, 2019 - 2023
- BSc (Hons) in Information Systems, Sabaragamuwa University, Sri Lanka, 2014 - 2018

PUBLICATIONS

- *Energy Efficient VM Consolidation in Cloud Computing Environments*, EdHat International Research Conference on Technology and Innovation, 2018.

ACHIEVEMENTS & LEADERSHIP

- Recipient of the Anita Borg Scholarship (2017), representing Sri Lanka at the Grace Hopper Celebration, USA.
- Mentor, Girls' Coding Bootcamp by Women Techmakers Sri Lanka & IEEE WIE.
- Volunteer instructor at Hour of Code (YouthSpark Live).
