

CHATHURIKA SENANI JAYATHILAKE

Senior Software Engineer / Technical Lead | React Native | React.js | TypeScript | Next.js

Sri Lanka | chathurikasenani@outlook.com | +94 713 544 477 | linkedin.com/in/chathurikasenani

PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of experience building scalable mobile and web products using React Native, React, TypeScript, and Node.js/NestJS. Strong background in frontend and mobile architecture, REST API integration, Nx monorepos, CI/CD, and test-driven development, with delivery experience across fintech, healthcare, and telecom domains. Proven ability to lead frontend and mobile workstreams, mentor engineers, review architecture and code quality, and collaborate with product, QA, and backend teams to ship reliable releases across iOS, Android, and web.

SKILLS

- **Languages and Frameworks:** React Native, React, Next.js, TypeScript, JavaScript, Node.js, NestJS, HTML5, CSS3, Sass
- **Frontend and Mobile Engineering:** Redux Toolkit, Context API, React Query/TanStack Query, Component-Driven Architecture, Responsive Design, Cross-Platform Development, Form-Driven Workflows
- **Architecture and Engineering:** Frontend Architecture, Mobile Architecture, Nx Monorepos, REST API Integrations, System Design, Technical Specifications, TDD, CI/CD
- **Testing and Quality:** Jest, Unit Testing, Code Reviews, Engineering Best Practices
- **Tools and Delivery:** Git, Agile/Scrum, Prisma, Keycloak, Google Analytics, Figma-to-Code Workflows, Mobile App Builds and Releases

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Surge Global (Pvt) Ltd | Aug 2021 - Present

- Delivered 14+ web and mobile applications across fintech, healthcare, and consumer platforms using React Native, React, Next.js, and NestJS, with a focus on scalable, maintainable solutions.
- Led frontend and mobile workstreams from technical design through release, partnering with product, QA, and backend teams to deliver on time.
- Contributed to architecture decisions, technical specifications, and system improvements with emphasis on scalability, maintainability, and developer efficiency.
- Worked within Nx monorepo architecture to enable shared components, modular services, and faster delivery across multiple applications.
- Applied TDD with Jest inside CI/CD workflows, improving reliability and reducing regression defects.
- Designed reusable REST API integration patterns to standardize frontend-backend communication and reduce repeated implementation effort.
- Contributed to backend API development and integration using Node.js, NestJS, and Prisma to support mobile and web platforms.
- Integrated third-party services including payment systems (Finix ACH, Apple subscriptions) and analytics tools (Google Analytics).
- Led code reviews and mentored junior and mid-level engineers through technical guidance, development planning, and day-to-day support.
- Improved CI/CD deployment performance and build times by optimizing monorepo build and deployment strategies.
- Collaborated directly with international clients through onsite engagements and remote discussions, contributing to solution design, feature delivery, and technical decision-making.
- Contributed to technical estimations, sprint planning, and solution design discussions.

Key Highlights

- Supported iOS and Android release processes, production deployments, and post-release issue resolution for React Native applications.
- Developed features including real-time chat, video calling, and complex UI workflows in React Native.
- Improved application stability and user experience by optimizing rendering performance, API handling, and reusable component architecture.
- Contributed to compliance-driven systems with structured workflows and backend integration.
- Leveraged AI-assisted development workflows to accelerate frontend delivery and streamline UI development processes.

PROFESSIONAL EXPERIENCE

Omobio (Pvt) Ltd | Sep 2018 - Aug 2021

Senior Software Engineer

- Led frontend development for a React Native application serving 10,000+ users while coordinating a team of 5 engineers across multiple releases.
- Developed and maintained telecom self-care applications for multiple clients, delivering scalable mobile and web solutions.
- Built responsive and dynamic web applications using Drupal, React, JavaScript, Sass, and PHP.
- Contributed to the revamp of Dialog web platforms, including CMS and self-care applications.
- Developed frontend features for self-care portals using React, improving user experience and responsiveness.

Software Engineer

- Migrated legacy mobile applications from Ionic 1 to React Native to improve maintainability and long-term scalability.
- Implemented structured error handling and resolved critical bugs to reduce application crashes and runtime errors.
- Delivered zero-defect change requests (CRs) for international telecom clients, demonstrating strong ownership and reliability.
- Implemented integrations such as rewards systems (mRewards) within mobile applications.
- Built and enhanced cross-platform mobile applications with a focus on usability, stability, and performance.

Software Engineering Intern

SriLankan Airlines, IT Department | Nov 2016 - Mar 2017

- Contributed to the revamp of the FlySmiLes loyalty program website, improving UI responsiveness and user experience.
- Developed a carbon footprint tracking module visualizing carbon, electricity, and fuel emissions.
- Built reporting features for flight delays and technical defect analysis, supporting operational insights.
- Collaborated with internal teams to deliver features aligned with business and operational requirements.

SELECTED PROJECTS

- **FFL Safe:** Contributed across a Next.js frontend and integrated with a NestJS/Prisma backend for a compliance-focused multi-tenant platform. Built inventory, bound book, contacts, transactions, Form 4473, payment, import/export, backup, and audit-history workflows with role-based access, reusable APIs, validation, PDF/email flows, and production-ready integrations.
- **Knoxcart:** Worked in an Nx monorepo powering admin, merchant, cart, and authentication portals using Next.js, React, and TypeScript. Built reusable frontend modules, React Query-driven data flows, payment and checkout integrations, analytics features, and modular UI systems that supported multi-portal delivery and maintainability.
- **Agilcare:** Developed a React and TypeScript command centre application supporting discharge management, dashboards, rule-based workflows, scheduling, notifications, and organisation management. Implemented reusable frontend patterns, API integrations, Storybook-driven UI work, and automated test coverage while improving performance and production stability.
- **Mobitel Self Care:** Led frontend development for Mobitel's telecom self-care React Native application for iOS and Android. Migrated the legacy Ionic 1 app to React Native, improving maintainability, stability, and long-term scalability. Built and enhanced self-care features including account management, billing, package subscriptions, and mRewards integration while coordinating multiple production releases for an international telecom client.

EDUCATION

- MSc in Big Data Analytics | Robert Gordon University, UK | 2019 - 2023
- BSc (Hons) in Information Systems | Sabaragamuwa University of Sri Lanka | 2014 - 2018

PUBLICATIONS

- Energy Efficient VM Consolidation in Cloud Computing Environments, EdHat International Research Conference on Technology and Innovation, 2018.

ACHIEVEMENTS AND LEADERSHIP

- Recipient of the Anita Borg Scholarship (2017), representing Sri Lanka at the Grace Hopper Celebration, USA.
- Mentor, Girls' Coding Bootcamp by Women Techmakers Sri Lanka and IEEE WIE.
- Volunteer instructor at Hour of Code (YouthSpark Live).
